## Water Research in Denmark

The Danish Water Research Platform (DWRP) in cooperation with Danish Water Forum organizes its 6<sup>th</sup> Annual Meeting at GEUS in Copenhagen, 26 – 27 January 2012. Researchers working with water issues are hereby invited to submit abstracts for possible presentation at the meeting, either for poster or for oral presentation.

The meeting will present results of ongoing RTD projects with participation of Danish research groups, including projects funded by national and international funding agencies as well as research projects addressing water issues in the developing countries.

There will be special sessions devoted to presentation of ongoing PhD projects and to water research in a wider context as cooperation between research institutions and industry/public authorities. Key note presentations introducing current water research in other countries with relevance for the Danish water sector will also be part of the programme.

The meeting covers topics addressing the whole water cycle as well as piped water, including freshwater, groundwater, wastewater, drinking water, industrial water, rain- and stormwater and coastal water. Abstracts within topics such as integrated water resources management, urban water management, monitoring, hydrological modelling, biogeochemical processes, water treatment and – supply, remediation, climate change impacts and adaptation, water quality and health, water reuse and various aspects of technology development are welcomed.
